Early Infantile Epileptic Encephalopathy 36

National Cancer Institute

Source

National Cancer Institute. *Early Infantile Epileptic Encephalopathy 36*. NCI Thesaurus. Code C142803.

An X-linked dominant form of early infantile epileptic encephalopathy, caused by mutation(s) in the ALG13 gene, encoding putative bifunctional UDP-N-acetylglucosamine transferase and deubiquitinase ALG13.
