Metastatic Malignant Neoplasm in the Esophagus

National Cancer Institute

Source

National Cancer Institute. *Metastatic Malignant Neoplasm in the Esophagus*. NCI Thesaurus. Code C7479.

A malignant neoplasm that has spread to the esophagus from another organ or system, or from another primary esophageal tumor. The primary esophageal tumor is not in continuity with the metastatic lesion. Representative examples of metastatic cancers to the esophagus include breast and lung metastatic carcinomas and melanomas.
