**Potential competing interests:** No potential competing interests to declare.

This is an interesting manuscript. However, to improve it, I suggest the author(s) should consider restructuring the manuscript so as to clearly establish its contribution.

The introduction is quite good. However, relevant literature should be reviewed and presented to properly situate the contribution(s) of the manuscript. The methodology and/or results need further discussions. The application of the median is associated with some shortcomings, and these should be highlighted as the limitations of the method.
