

Review of: "Perspectives on the Immune System in Sepsis"

Berna KAYA UGUR

Potential competing interests: The author(s) declared that no potential competing interests exist.

A very interesting and anticipatory title and an engaging and insightful compilation in general.

The introduction is descriptive, summative, well written.

In the pathobiology section, it can be confusing when reading because the names of the genes are very similar to each other, but very up-to-date information is included.

The results could be finalized with key notes.
