Potential competing interests: No potential competing interests to declare.

The problem statement is good but the article did not quite hit the nail on the head. I would suggest as title "Status of digitization of government public library services in Bangladesh OR Digital Transformation of Public Libraries in Bangladesh: Opportunities and Challenges."

Digital Transformation of Public Libraries

I suggest that there should be a the advantages of digitization of library resources should be further highlighted

The world view of Digital transformation of Public Libraries.

On the subheading: The world view of Digital transformation of Public Libraries. Overview (rather than world view) of Digital Transformation of Public Libraries. Note that the first paragraph is a repetition of line 4-5 of the Introduction.

Under South America: Line 3: Offering clients with...(with should be deleted).

Challenges: Paragraph 2, line 4: This restricts...to offer clients with (offer digital materials and services to clients).

I suggest that the opportunities for digital transformation of public libraries in Bangladesh should be discussed before the challenges and they should be clearly separated from each other. As it is, there are some repetitions.

Conclusion should stand as a subheading of its own rather than submerged under opportunities. It should give a short summary of the issues raised in the work.

Finally, the article holds some promise but it is rather short.
