Potential competing interests: No potential competing interests to declare.

This article is a good addition in understanding the economic crisis in Ethiopia. However, there is always a room for improvement. Hence, below are few suggestions,

- It would be more helpful to show the trend of variables with the help of graph. It will clearly indicate the magnitude of the variables.
- A tabulated summary of the variables affecting the Ethiopia's performance will also be supportive with the indication through arrow direction that whether there is improvement or deterioration in the variable.
