Potential competing interests: No potential competing interests to declare.

When changing modified atmosphere environments, do not forget ethylene, which promotes fruit ripening. Observe the punctuation when writing the items, mainly by placing two points in some items and not in others. Some adjectives placed in the text are not very scientific, but colloquial, for example, vibrant condiment, explosion of flavors, fantastic complement, stimulating sweet, indulgent flavor, ecological footprint, persimmon enthusiasts... In the Future Perspectives item, is it appropriate to mention that persimmons are fruits with unique flavors? As alternatives for packaging, materials such as glass and silicone are mentioned, but the coating of fruits with edible biopolymers such as starch, proteins, and lipids, which is environmentally correct and friendly to the environment, is not mentioned. Phrases that are not very recommended for scientific writing are observed in the conclusions, such as "paints a rich tapestry of approaches, cultural resonance." What are the healthy considerations?
