Epidemiology and Cancer Control Shared Resource

National Cancer Institute

Source

National Cancer Institute. *Epidemiology and Cancer Control Shared Resource*. NCI Thesaurus. Code C39395.

The Epidemiology and Cancer Control Shared Resource provides consultation and support to the Cancer Center investigators conducting research projects related to cancer epidemiology and control, health behavior and quality of life research, and molecular and clinical oncology. Areas of support are, but not limited to: study design, data collection, quality control and analysis, software and measurement error models development, statistical programming, and interpretation and dissemination of results.
