Potential competing interests: No potential competing interests to declare.

The topic of the paper is interesting since it reflects issues in higher education in the context of massive urbanization in a rapidly developing country. However, more work is needed to improve it. Here are some suggestions:

- Need to provide methodology and results in the abstract
- Many facts and implications should be referenced so that non Chinese readers can gain better understanding
- An explanation of the Chinese higher education curriculum structure can be given, so that the current 'gap' can be highlighted
