Thank you very much for providing me the opportunity to review this piece of article.

This article presents a very interesting topic of "Contentious Biometric Voters Registration and Democratic Politics under COVID-19". The article is very well written and presents relevant literature about the topic. However, there are few areas of improvement that needs to be addresses.

Abstract: line 3 "fair, and fair democratic elections." needs to be reviewed as it appears to be a typo error.

Introduction: Hook for the reader is missing in the beginning of this chapter. The author must start this chapter with a hook for the readers. Adding a hook will make it more interesting for the target audiences.

Rest of the manuscript is well written.
