Review of: "Determining Affinity of Social Network using Graph Semirings"

Mehjabin Khatoon

Potential competing interests: No potential competing interests to declare.

Well overall I can say it's a novel research work, but there are few shortcomings in this article:-

1. There is no conclusion in this research paper, so how can we predict the outcome of this work.
2. Author's should clearly discuss the term "semiring" in the article.
3. Relationship clarification required between the algorithm and it's applications.
