Source

National Cancer Institute. *Newfoundland*. NCI Thesaurus. Code C53765.

The Newfoundland is a strong, massive dog with a broad heavy head and webbed feet. The water-repellent long outer coat is flat, oily and slightly wavy with a thick oily undercoat. The small triangular ears are pendant. The coat most often comes in black, (sometimes with a little white on the feet, end of the tail, or chest) black with blue highlights, bronze sometimes also in brown or gray and Landseer (White with black markings). Height: 25-29 inches (63-74 cm.) Weight: 100-150 pounds (45-68 kg.)
