Potential competing interests: No potential competing interests to declare.

I appreciate that this research is interesting and contextual. Theme: Women's Business Performance in Promoting Sustainable Development.

My input is:

1. Brief abstract, objectives, problems, theory, population and sample, findings, and recommendations. Eliminate numbers and places.
2. Important background in conveying: DATA research gap, theoretical and empirical gap. Give your research novelty position.
3. Next, provide a descriptive description of the measurement of the results of all research variables to solve the research problem at your location, and continue to test the hypothesis. Consistent throughout the discussion and conclusions-recommendations. Thanks. Greetings research
