

# Review of: "Leveraging Fine-Tuned Large Language Models in Bioinformatics: A Research Perspective"

Claudia Caudai<sup>1</sup>

<sup>1</sup> Italian National Research Council

**Potential competing interests:** No potential competing interests to declare.

The paper has a very informative aspect. The ideas are good but should be explored with examples and case studies.

The flow and division of the paragraphs is fine, but it is necessary to deepen the technical aspect, collect works and report examples, advantages and problems of the techniques analysed, for each paragraph.
