## GENERAL COMMENTS BEFORE STATTING A REVIEV OF ARTICLE IN Qeios:

1. I cannot access to the official page (link) the Journal homepage. In connection to this I cannot access a link to the following documents:

i/ Guidelines to authors

ii/ Guidelines to reviewers

Since I cannot access the above documents, I faced difficulty to check the abstract writing style for your journal. Please help by sending appropriate link!

For instance, your abstract did not indicate the methods you following to come up with your review outcomes.

=====

In the abstract section the key words are misplaced. Please bring the key words directly after the abstract paragraph and then continue with the names of the authors with their institutional affiliations.

The scope of the review is also not clearly indicated. That is whether the review focused on local, national, regional or global context. Better if the distribution maps of the plant included.

Botanical description of the plant is not complete. For instance, the ecology of the plant .....

PterocarpFirst published in Pl. Coromandel 2: 9 (1799)

This species is accepted

The native range of this species is Indian Subcontinent. It is a tree and grows primarily in the seasonally dry tropical biome.us Marsupium Roxb
