Potential competing interests: No potential competing interests to declare.

1-The study is a good example in terms of revealing the working principle of artificial neural networks. In order to reveal the content of the article more clearly, information about missing functions should be given.

2- References should be strengthened. In fact, at the end of the introductory part, the studies made with the subject and artificial neural network can be exemplified.

3- It is recommended that the contribution of the article to science in terms of innovation be reflected in a concrete way with data.
