Potential competing interests: No potential competing interests to declare.

This manuscript explored the facility management challenges of public educational facilities in Nigeria contexts, which may also be of practical importance. However, there was still room for development, and the comments and suggestions included below may help to improve the manuscript further. 1. The statement of research problems is not clear. 2. Provide the demographic information on respondents such as type of the institution, the respondents' identity category, and respondents' experience period and so on. 3. In the manuscript, the conclusion is missing. 4. Research limitations and implications are also missing in the manuscript, which may prevent readers from obtaining practical implications for this study and for future research.
