

Review of: "The Future of Malaysian SMEs in the Digital Economy"

Dekeng Setyo Budiarto

Potential competing interests: No potential competing interests to declare.

Abstract: is this research a literature review? Preferably explained in the abstract.

Introduction:

1. The first paragraph should contain empirical phenomena from previous research findings explaining why digitalization in SMEs is essential.
2. Second paragraph, what about the empirical findings in Malaysia?
3. Too much quoting from the OECD 2020
4. Researchers have not explained the research motivation

Literature review

1. Adoption of Digital Economy: Is there no empirical research on IOT?
2. The Benefits of Digital Economy: in the last paragraph, there is no source
3. How is the vortex implemented in Malaysia?
4. How is the implementation of ICT-Powered SMEs in Malaysia

Discussion and Conclusions

1. Were the research questions answered in the discussion?
2. It is better if the discussion is followed by empirical reasons, not the opinion of the researcher

Recommendations for Future Study: Give suggestions that are opportunities for further research along with empirical reasons

Recommendation: this research is not yet fit for publication because most of it is the opinion of the author
