

Peer Review

Review of: "A Review on the Mechanical, Thermomechanical Properties and Crystallinity Aspects of 3D-Printed Nanocomposites Used for Fabricating Electronic/Structural Parts"

Muhammad Azfar Jamal¹

1. Institute of Space Technology, Pakistan

Thank you for the opportunity to review this manuscript. I have completed and submitted my review on Qeios as an attachment. Please let me know if any further necessary action is required. Additive Manufacturing being my primary field, I am available as a reviewer for your prestigious journal in the future.
