**Potential competing interests:** No potential competing interests to declare.

Experimental work and its demonstration are quite elucidating; it's evident that considerable effort has been invested in this study.

Suggestions:

The novelty should be better highlighted by emphasizing how this study fills the lacks in the literature. (You can show the deficiencies before demonstrating the novelty for clarity).

There is a need for a more comprehensive literature review and the inclusion of recent references.

Strongly advise editing for Academic English.

In the introduction, it would be better if the novelty and purpose of this study are highlighted.

It would be better if the deficiencies in the literature and the contribution of this study were mentioned in the conclusion.
