Potential competing interests: No potential competing interests to declare.

To the authors: Please take note of the following modifications:1- Please substitute "health care settings" for the term "human" in the manuscript's title.2- The topic has been expertly covered in the introduction section.3- Explain the meaning of the varying color intensities in Figure 1.4- It suffices to state the number of articles utilized for the results without mentioning the relevant percentages.5- In Figure 3, it is sufficient to write the references in the legend.6- In order to account for any geographical commonalities in the AMR patterns identified, it would be interesting if the authors compared their data to those of other regional nations in the discussion.
