Dear author,

After reading your manuscript, my comments are:

1. The abstract needs to be re-written for better clarity.
2. In general, significant proofreading is needed, especially in the introduction section.
3. Terms like "in vitro" should be in italics.
4. An acronym section is needed if this is to be available to a broader audience with limited knowledge of the topic.
5. The question in the abstract is quite rhetorical and shall not be included, since it leads to assumptions.

Best wishes,
