Potential competing interests: No potential competing interests to declare.

This manuscript summarized the future development direction of precision medicine. Personalized and precision medicine can proactively predict disease risk, continually monitor human health status, and reduce the costs associated with large clinical trials. This work is very novel and interesting. However, the following issues should be addressed before the paper is considered suitable for publication in *Qeios*.

1. The language should be improved.
2. Please check the format carefully. For example, the text of the article needs to be aligned at both ends.
3. Please check the references carefully. There are some formatting errors. For example, the title case is inconsistent.
4. Please provide some graphic explanations about the examples given in the article.
5. In challenges, please introduce the shortcomings of precision medicine.
6. There have been many articles on this topic in recent years. What are the advantages of this review compared with other reviews?
7. Introduction, the authors talked about the medicine. In order to support this statement, the following recently published important related papers should be cited: *Chem. Soc. Rev.***2017**, 46, 7021; *Exploration* **2021**, 1, 21; *Chem. Soc. Rev.***2021**, 50, 2839; *VIEW* **2022**; 3:20200185; *Asian J Pharm Sci.* **2022**, 17, 253; *Adv Mater.* **2022**, 34, 2106388; *Molecules* **2023**, 28, 1470; *Sci. China: Chem.* **2023**, 66, 613; *Adv. Mater.***2023**, DOI: 10.1002/adma.202304249.
