BLVRA wt Allele

National Cancer Institute

Source

National Cancer Institute. *BLVRA wt Allele*. NCI Thesaurus. Code C152038.

Human BLVRA wild-type allele is located in the vicinity of 7p13 and is approximately 49 kb in length. This allele, which encodes biliverdin reductase A protein, plays a role in protoheme degradation. Truncation mutations in the gene are associated with hyperbiliverdinemia.
