Thank you to the respected director of the magazine and its staff who encouraged me to share the article for review and review. I suggest the following additions:

1- Add at the beginning of the introduction a paragraph about quantum mechanics and another paragraph about Hilbert space and why quantum mechanics is studied in Hilbert space, with reference to the nature of the effects in quantum mechanics.

2- I also suggest adding a paragraph on groups

3- The pictures attached to the article must be in the center of the paper with the reference

Finally, I recommend publishing the research paper, wishing the researcher further success.
