

Review of: "Ternary instantaneous noise-based logic"

Renuka G

Potential competing interests: No potential competing interests to declare.

The concept is good but the following changes can be done

1. What is the significance of ternary logic in AI.
2. Any application in detail can be discussed.
3. Literature survey is missing.
4. What is the motive to use ternary logic.
5. Limitations of existing methods can be discussed.
6. Grammatical mistakes are there.
7. At the figure names lengthy explanation is given, explanation can be given in separate paragraphs not at figure names.
8. References are not cited properly.
9. Page no 3 equation 2 is incomplete.

In 1.2 4th line random telegraph waves r t and w can be capital
