**Potential competing interests:** No potential competing interests to declare.

## Abstract

**Purpose:** The reason for this study was not mentioned.

**Research Method:** Why the “)” after cultivated area. (II) - implies what?; Which software was used for the analysis? Are there indices that are of utmost importance in the study? What are the things that can be inferred from the findings, the implications of the output from the study? The method is inconclusive.

Are there considerations for Unit root, Stationarity, co-integration, etc?

**Keyword:** Replace Nigeria with Production cycle

## Introduction

There is need to build the introduction to reflect the study objectives. As it is now, the presentation look so disjointed. There is the need to improve on the introduction with section to clearly present distinct term. It was all lump-up :- COVID-19, Rice, agriculture etc. Despite this Development, Nigeria's rice statistics ... Put Ref.

## Lit Review

Articulate the Literature review pointing out the important discoveries and identified knowledge gap.

## Research Methodology

Full meaning of FAOSTAT.

Which tool did you use for the analysis?

You didn't mention anything about the approach to be used.

There is need for English improvement of the manuscript

## Result and Discussion

The results should be discussed extensively comparing with other relevant articles. Citation of relevant documents missing in this study.

There is need for consulting widely to improve the quality of this manuscript.
