

Review of: "What substances are adolescents vaping? Estimating nicotine-specific and marijuana-specific vaping from US national youth surveys"

Lance Wallace

Potential competing interests: No potential competing interests to declare.

An important paper emphasizing the ambiguities in current surveys of tobacco and marijuana use in vaping. It should be provided to the managers of the two surveys mentioned.

I offered two possible references on exposure to marijuan while vaping:

1. Ott, W.R., Zhao, T., Cheng, K-C, Wallace, L.A., and Hildemann, L.M. (2021). Measuring indoor fine particle concentrations, emission rates, and decay rates from cannabis use in a residence. *Atmospheric Environment*. <https://doi.org/10.1016/j.aeaoa.2021.100106>
1. Wallace, L., Ott, W., Zhao, T., Cheng, K-C, and Hildemann, L. (2020). Secondhand exposure from vaping marijuana: Concentrations, emissions, and exposures determined using both research-grade and low-cost monitors, *Atmospheric Environment X*, <https://doi.org/10.1016/j.aeaoa.2020.100093> (Accessed 11/19/20)

Also recommend looking at the work of Suzaynn Schick.

Minor editorial comments are included in the authors' manuscript (inword format) but I don't see just how to upload my review here.
