Potential competing interests: No potential competing interests to declare.

This paper has been written well; however, there is still a need for some corrections for the final version. After such changes, it will be a good article for the reader.

Scientific name: Pagrus caeruleostictus should be added to the Key words' list.

Rewrite the Introduction as follows:

- 1. Introduction of the studied species
- 2. Importance of the items
- 3. Management of this species using size at sexual maturity, spawning season
- 4. Available studies/literature
- 5. Novelty
- 6. Objectives

Figures of the size at sexual maturity should be corrected according to King (2007); follow Hossain et al. (2024):

Hossain, M.A., Laboni, T.A., Khatun, M., Rahman, M.A., Hossen, M.A., Rahman, O., Ilah, N.E., Marey, S.A., Mostafa, A.A., Ohtomi, J., and Hossain, M.Y., 2024. Exploring the reproductive features of Clupisoma garua from the Ganges River, Bangladesh: insights into eco-climatic factors for sustainable management and advancements in aquaculture practices. *Environmental Science and Pollution Research*, pp.1-15.
