Potential competing interests: No potential competing interests to declare.

This paper's review process lacks a systematic and rigorous approach, and there is no transparency in the methods used for paper identification and collection. As a result, the reproducibility of the review process is questionable, and the review may have missed crucial research papers. Furthermore, it is worth noting that the majority of the reviewed papers are not peer-reviewed and may be in the form of posts, given that the field is still emerging. Therefore, the findings presented in this review must be interpreted with caution.
