Dear Editor,

I am honored to collaborate with your journal.

The topic of the article about a case of pain due to peripheral neuropathy is very interesting.

I propose a few suggestions to make more readable the article.

Sincerely,

RC

Dear Authors,

I propose a few suggestions to make more readable the article.

- Introduction: At the end of the introduction add the aim of the work... to describe this case report to...
- Introduction: "Written informed consent was obtained from the patient for publication" move the sentence from introduction to case report.
- Can you improve the images?
- Discussion: At the beginning of the discussion, explain the results
- Discussion: Even if rare, add the role of small fiber neuropathy (it seems also implicated despite the complicated concurrent presence)
