Potential competing interests: No potential competing interests to declare.

The author conducted multiple case studies and compared the similarities and differences of different enterprises in the digital business environment. This study has good practical significance. As a country with the largest number of Internet users, Indonesia has profound practical significance to study the sharing platform enterprises in its digital business environment, and it can also provide experience for other countries with similar Internet foundation and development level. However, the paper also needs a deeper theoretical explanation and a richer content of future research trends.
