Review of: "AI Ethics by Design: Implementing Customizable Guardrails for Responsible AI Development"

Reyhane Izadi¹

1. Healthcare services management, Shiraz University of Medical Sciences, Iran, Islamic Republic of

The paper provides some valuable insights regarding the issue of ethics in AI. However, it doesn't adhere to a formal guideline or framework for methodology and article structure proposed by the renowned peer-reviewed scientific journals, such as PRISMA, CONSORT, or STROBE. I believe that adhering to a formal framework or guideline significantly increases its validity and readability.
