

Review of: "Prevalence of visual impairment and associated factors among welders in West Shewa Zone Oromia Region, Ethiopia"

Habtamu Hasen

Potential competing interests: No potential competing interests to declare.

Thank you for coming to address important public health problems. However, the papers were not done properly and need reanalysis and rewriting.

Sample sizes inconsistent: 424 and 634.

References were 22, but refs 44, 46, 48, and 51 were mentioned in the discussion.

Many authors participated, but it says "my result."

Authors did not detail their understanding of the analysis of regression. Why did he/she enter frequency, sex, and age ?

Discussions were not properly explained and did not elaborate on factors.

Better to remove p-values from table 6 if AOR is there.

It is mandatory to analyze and come to valid and reliable findings. It needs grammatical correction.
