Monoclonal Antibody CO17-1A

National Cancer Institute

Source

A murine IgG2 monoclonal antibody against the tumor-associated antigen 17-1A. Administration of monoclonal antibody CO17-1A (Mab C017-1A) elicits an antibody-dependent cell-mediated cytotoxicity. In addition, Mab C017-1A has preclinically acted as an immunogen for development of anti-idiotypic antibody BR3E4. (NCI)
