Putative Insulin-Like Growth Factor 2 Antisense Gene Protein

National Cancer Institute

Source

National Cancer Institute. *Putative Insulin-Like Growth Factor 2 Antisense Gene Protein*.

NCI Thesaurus. Code C114314.

Putative insulin-like growth factor 2 antisense gene protein (168 aa, ~18 kDa) is encoded by the human IGF2-AS gene. This protein may play a role in Wilms tumor formation.
