# Press-On/Twist-Off Metal Container Closure

National Cancer Institute

## Source

National Cancer Institute. *Press-On/Twist-Off Metal Container Closure*. NCI Thesaurus. Code C96123.

Closure with a stepped, skirted drawn shell with an inside curl. The closure is lined with an annular plastisol material designed to provide a proper seal along the top and side surfaces of the glass container finish. The closure uses a special plastisol material that, following application, takes a permanent impression of the glass threads ensuring cam-off and reseal.
