Monoclonal Antibody 81C6

National Cancer Institute

Source

National Cancer Institute. *Monoclonal Antibody 81C6*. NCI Thesaurus. Code C1958.

A murine IgG2 monoclonal antibody (MoAb) 81C6 raised against the extracellular matrix antigen tenascin (hexabrachion), up-regulated in gliomas and other cancers. Conjugated MoAb 81C6 may be used in diagnosis or treatment of cancers that over-express tenascin.
