Potential competing interests: The author(s) declared that no potential competing interests exist.

The authors are right in pointing out that the format of the ontological and the lexicographic definitions should be different because the two perform different functions. The review article describes the achievements of other article by Seppälä, Ruttenberg, and Smith in this direction, their results and the main - comparison, analysis and discussion of these results. Covering these examples along with others that have been left out will make the article more perfect.
