Potential competing interests: No potential competing interests to declare.

My comments:

The article is interesting, detailed and attracts the attention of the reader throughout.

I suggest that keywords should follow each other in alphabetical order and others can be combined, and be displayed as follows:

Keywords: Angola Higher Education, attendance, curricula, meaningful learning, students, teaching

Curricula can also be included as a concept or keyword because it features in the abstract.

I also suggest that the author includes research objectives and research questions and fully justify paragraphs (formatting).
