**Potential competing interests:** No potential competing interests to declare.

Dear author,

It is an interesting article, however, it needs to be improved to be a reference for future analysis and research.

**Abstract:** It is necessary to describe the methodology used, and its results and conclusions.

**Introduction:** it should specify the nature and scope of the problem investigated, present a review of the literature on the subject of the article, establish the method used in the study, and describe the type of results obtained.

**Methodology:** The methodology used must be specified. I suggest you review articles on how to conduct and publish a Systematic Literature Review.

**Results and discussion:** They must present the results of the analysis carried out on the articles obtained from the RSL.

**Conclusions.** It is important to have a conclusions section, where the main findings of your research are consolidated.

**Bibliography.** In the bibliography section, only the authors who are cited in the article should be included.
