Review of: "Sustainability in the Hotel Sector: A Research Study in Greece"

Martin Spiller¹

1. Independent researcher

I am very positive about the paper.

Some inputs were already implemented in the update; basically, I have two points:

1. In the section on Infrastructure development / Renewable Energy Networks: Please add a short phrase about the special situation at the non-interconnected islands, where the installation of renewables is limited due to net stability concerns.
2. In the section Hotel managers' attitudes towards sustainability impact their implementation of green practices

First sentence:

The attitudes of Greek hotel managers towards sustainability significantly influence the implementation of green practices within their establishments.

Beginning of the second paragraph:

The attitudes of hotel managers towards sustainability significantly influence the implementation and success of green practices in the hospitality sector.

There is a repetition of a phrase; please change the wording in the second sentence.

In summary: I fully recommend the paper with very minor changes.

Kind regards,

Martin Spiller
