Potential competing interests: No potential competing interests to declare.

About the Abstract: Though the abstract Provides a comprehensive view of the research, it can be made better with good organization of the content. For instance the opening sentence of the abstract "This literature review aims to explore and summarize the existing research on the impact of TikTok on students." could be placed after a brief introduction on Tik Tok. In the conclusive part of the abstract, "The findings from this review highlight both the positive and negative aspects-(replace with impacts) of TikTok and provide insights into its risk full potential influence on students.

Comment on organization: The paper lacks clear organization. The content seems to jump between various topics related to TikTok without a well-defined structure. It's important to organize the content logically with distinct sections, headings, and subheadings.

Language :There are minor grammatical errors in the research paper. For eg. in the introduction, The error in the sentence is in the phrase "Chinese marketing." It should be "Chinese market." Here's the corrected sentence: "TikTok is a social network launched in the Chinese market in 2016."

Relevance: The paper includes a wide range of information, some of which is tangential to the main topic. For instance, the inclusion of internet usage statistics in Sri Lanka appears unrelated to TikTok's impact on students. While the paper touches on various aspects of TikTok, it lacks in-depth analysis and critical examination. It's crucial to provide more insight and critical evaluation of the effects of TikTok on students, including both its advantages and disadvantages. The paper's conclusion if effectively summarize the key findings and insights gained from the literature review will prove to be more beneficial as it should provide a clear takeaway for the reader.

Recommendations:

While the paper attempts to cover various aspects of TikTok's impact on students, which is a commendable thought, it would benefit from a clearer structure, more focused content, and improved language and writing style. Additionally, if the paper provides in-depth analysis and attribution for the studies and statistics cited to enhance its credibility and readability.
