Potential competing interests: No potential competing interests to declare.

This article offers a very interesting insight into the migration phenomenon. There is novelty in the topic being explored. Since this is not a highly investigated topic, it offers a crucial contribution to the body of knowledge in the present body of knowledge on migration. However, for a more systematic and organized presentation of the article, the author must coherently provide headings to categorize contents in terms of introduction, methodology, and findings/discussion. It is also not clear in the presentation how the framework was generated using a qualitative methodology; the author must succinctly provide a description of such. Furthermore, the author must carefully cull references to reflect those that are recently published; most references can be traced to earlier than 2015. Otherwise, this reviewer thinks that the article is very insightful and informative.
