Review of: "Sustainability in the Hotel Sector: A Research Study in Greece"

Ata Al Shraah¹

1. Faculty of Business, Business Administration Department, Hashemite University, Jordan

The paper is very good; however, there are some points that should be amended:

- The abstract needs revision, especially regarding novelty and conclusions.
- The discussion is weak; it should be more comprehensive.
- The paper, in general, needs proofreading and editing.
- The aim of the study stated in the abstract and the section Post-COVID sustainability momentum is different. You need to align the two.
- In the section Post-COVID sustainability momentum, discuss the implications of increased tourist arrivals on sustainability practices in the hotels.
