Review of: "SnakeChat: a conversational-AI based app for snake classification"

Muhammad Amir Malik[1]

1 International Islamic University, Islamabad

The language of paper is informal & casual, for example in abstract, it states "our model " & "their GPt" etc. There is need of comprehensive review with respect to linguistic errors.

introduction section need review. There should be some data on background of CAI & how it is helpful in developing bio-informatics systems. Further, there is no coherence between the paragraphs.

Figure 3 is not readable, it needs revision and addition of detailed information.

A table of results must be added to clarify the results, table must reflect name of API,
