Potential competing interests: No potential competing interests to declare.

The paper is good and interesting, and here are some suggested improvements to enhance the quality of the paper:

Title Revision: Consider shortening the title to make it more concise and impactful while still capturing the essence of the study.

Abstract Enhancement: Rewrite the abstract to include more specific details about the study objectives, methods, key findings, and implications.

Conclusion Refinement: Make the conclusion more clear and concise by summarizing the main findings and their significance in a straightforward manner.
