Buttiauxella ferragutiae

National Cancer Institute

Source

National Cancer Institute. *Buttiauxella ferragutiae*. NCI Thesaurus. Code C122253.

A species of facultatively anaerobic, Gram-negative, rod-shaped bacteria in the family Enterobacteriaceae. *B. ferragutiae* is positive for lysine decarboxylase and D-sorbitol metabolism and negative for ketogluconate and malonate activity. It was originally isolated from soil.
