I would like to thank you for the opportunity to review an interesting article. Overall, the article is well structured, coherent and generally well written. I recommend some major improvements:

1. Research hypothesis should be one of the results literature review, I recommend to put in the second chapter of article
2. I didn't notice an explanation a definitions of entrepreneurship and how Authors will be analysis a theoretical construct
3. I didn't notice when a research was conducted
4. Authors used a structured questionnaire but is lack of merit description of questionnaire
5. Lack of discussion part and comprehensive compare results with others
6. The conclusion should highlight the theoretical and practical implications of the research results,
7. There are some language errors. It is suggested to check the linguistic correctness of the manuscript and refine the language level. There are some typing errors, missing spaces in the manuscript.

Thank you and good luck!
