Potential competing interests: No potential competing interests to declare.

The author's analysis is interesting and useful. Unfortunately, the conclusions are not supported by a processed data set to support these conclusions.

I recommend the author to improve the analysis of the data collected in his research.

Including research objectives can help to better structure the paper. Correlating the results with the stated objectives can generate a useful discussion to strengthen the conclusions of the paper.

The work is promising for enriching research in this field.
